PROFILE

I consider myself a curious and fervent problem solver, a consistent learner with good grasping ability. I am reasonably comfortable working across the stack with a preference to backend development. As a budding full-stack developer I aspire to a result-focused working environment as I am eager to learn and challenge myself.

SKILLS

- Object Oriented Programming
- Design Thinking
- Software Development
- Test driven development
- Problem-Solving
- Detail oriented
- Project Management Tools
- Strong Communication
- Working in a team
- Documentation

EXPERIENCE

WETHINKCODE_

Software Engineering Student

2021 - Present

Languages that we have learnt include Python, Java, JavaScript and Basic SQL. I'm also trained in Procedural Programming, OOP, Databases, Testing, Brownfields and Web APIs.

With experience in JSON, HTML&CSS, Node.js, React.js, Express.js and jquery. I have also built a few small applications using Motoko. I can conduct technical reviews, write technical reports and document my work to industry standards and in a professional manner.

WETHINKCODE_

Bootcamp Assistant

2022

I have been assisting with the Bootcamp selection process as a Bootcamp Assistant responsibilities include but are not limited to. Helping the bootcampers with any problems that they are encountering. Giving advice and guidance to bootcampers on projects or understanding fundamental concepts. Giving advice as to how they might improve. Keeping an eye on cultural and social matches to the WeThinkCode_ ethos.

EDUCATION

VICTORIA GIRLS HIGH

Matriculant

2017
